BAKER ENERGY DE VENEZUELA, C.A. AWARDED CHEVRON GLOBAL TECHNOLOGY SERVICES LABOR CONTRACT IN VENEZUELA

CARACAS, Bolivarian Republic of Venezuela – Baker Energy de Venezuela, C.A. (BEVCA), a subsidiary of Michael Baker Corporation, announced that it has been awarded a two-year manpower contract by Chevron Global Technology Services Company in the Bolivarian Republic of Venezuela.

Under the contract, BEVCA will provide recruiting services for administrative and technical personnel. The contract encompasses over 135 Venezuelan operations and maintenance (O&M) personnel and support staff.

“This significant support contract award speaks to the quality of BEVCA’s project administration and management and professional staff,” said Rafael Diaz, president of BEVCA. “We are very proud of our global affiliation with the various Chevron business units around the world.”

BEVCA provides labor and manpower services to the increasingly developing natural gas sector in the Bolivarian Republic of Venezuela. Its U.S. affiliate, Baker Energy also provides operations, maintenance and technical services for several Chevron projects around the world.

Baker Energy (<http://www.bakerenergy.com>) works with oil and gas companies worldwide to provide total asset management solutions. By integrating its diverse operating and management skills, Baker has evolved into a single source supplier of comprehensive energy services, including operations assurance and maintenance management solutions, competency-based personnel recruiting and training, operations and maintenance manpower, and supply chain and logistics management.

Michael Baker Corporation (<http://www.mbakercorp.com>) provides engineering and operations and maintenance services for its clients’ most complex challenges worldwide. The firm’s primary business areas are aviation, defense, environmental, facilities, geospatial, homeland security, municipal & civil, pipelines & utilities, transportation, water, and oil & gas. With more than 4,500 employees in over 50 offices across the United States and internationally, Baker is focused on creating value by delivering innovative and sustainable solutions for infrastructure and the environment.
