BAKER ENERGY DE VENEZUELA, C.A. AWARDED ISO 9001:2008 CERTIFICATION

CARACAS, Bolivarian Republic of Venezuela – Baker Energy de Venezuela, C.A. (BEVCA), a subsidiary of Michael Baker Corporation, announced today that it has been awarded a dual certification for implementing and maintaining a quality management system that fulfills the requirements of the ISO 9001:2008 standard.

The ISO certification was granted by two certifying organizations, IQNet and FONDONORMA, (the Venezuela Fund of Standardization and Quality Certification) and encompasses process engineering services for the petroleum, energy and industrial sectors. Jose Rafael Diaz Croquer, BEVCA president, accepted the certificate from Fabian Ugas, certification manager of FONDONORMA, at a ceremony in Caracas on July 10, 2009.

The certifying organizations assessed and audited business functions that related to the management team's performance with particular emphasis on management control and activities revolving around business development. Additionally, in order to assess project operations, FONDONORMA interviewed project staff members involved in several BEVCA projects and evaluated procedures developed by technical staff, as well as records generated during these projects and activities supporting business processes such as human resources, information technology, administrative services and HSE&C.

“Although our objective was to achieve ISO certification, making a daily effort to continuously improve our quality processes is always our main priority,” said Diaz Croquer. “We are grateful to have received this certification from IQNet and FONDONORMA, and intend to continue delivering value and quality service to our clients.”

FONDONORMA (<http://www.fondonorma.org.ve/>) is a non-profit, legal organization created in September 1973 to promote the activities of standardization and quality certification with the intention of stimulating the competitiveness of the productive sector of Venezuela.

Baker Energy (<http://www.bakerenergy.com>) works with oil and gas companies worldwide to provide total asset management solutions. By integrating its diverse operating and management skills, Baker has evolved into a single source supplier of competency-based personnel recruiting and training, comprehensive pre-operations, operations and maintenance services, and supply chain and logistics management services.

Michael Baker Corporation (<http://www.mbakercorp.com>) provides engineering and operations and maintenance services for its clients' most complex challenges worldwide. The firm's primary business areas are aviation, defense, environmental, facilities, geospatial, homeland security, municipal

& civil, pipelines & utilities, transportation, water, and oil & gas. With more than 4,500 employees in over 50 offices across the United States and internationally, Baker is focused on creating value by delivering innovative and sustainable solutions for infrastructure and the environment.
